Up to:

Maximum Weight for Chillow Plus 2.85KG (2800gms = 6.3Lbs)

2.6 Litres = 4.6 (Approx) Pints

NB: Over time water can evaporate from a Chillow. **It is very important that the Chillow should weight as per the table above.** If the weight is correct but your Chillow is still not cool enough (Or does not stay cool for long enough) then please increase the weight with clean tap water to the Maximum weight shown above. Please remember that after having added water the Chillow should be left for 4 Hours to settle and then remove air by **lightly** rolling before re capping.

A pair of bathroom or kitchen scales can be used to weight the Chillow.

We do not recommend emptying the Chillow because there is an anti bacterial agent inside. However, if travelling and water has to be removed, then please use the weights above to reactivate the Chillow once at the destination. Do not rely on quantity of water as the Chillow will have retained some after emptying.

If the above does not deal with your problem, please call us at Soothsoft on 01494 882224.
